I am an Artificial Intelligence and Big Data developer with specialized training. My background is in deep learning and data visualization, using Python libraries. I am committed to leveraging my skills in these areas to contribute to innovative projects and advance the field of AI. Additionally, I have experience developing with Docker in continuous integration and microservices environments.

Date of birth: 05/02/1997   **Nationality:** Spanish

PROJECTS

LLMOps Build a Real World App – LLM (llama3) and statics in Comet   06/03/2024 – 09/03/2024
Write here the description…it its the research of the project proposed in the course is done. An LLM model, llama3, is achieved, which is given a well-structured prompt to obtain a specific result for each sentence. Performance and statistics are uploaded to COMET, a website where you can see the general statistics of our project.

Elasticsearch Integrated Data Search & Analysis - Docker   09/03/2024 – 22/03/2024
This repository integrates Elasticsearch for data search & analysis. Data is loaded from CSVs via Kibana, queries are made using templates from DevTools, and a VueVite app allows direct Elasticsearch queries. A Node.js backend option is also available. All managed and deployed using Docker.
